About Dr. Joanna Fadel

"A member of the American Academy of Cosmetic Dentistry since 2007, I first graduated as a general dentist in 1996. I then went on to receive my Prosthodontics Postgraduate Degree in 1999.

Having grown up with a passion for Arts and Sciences, cosmetic dentistry was the common ground where I could practice both my passions.

Today, I have clinics in Jumeirah and the Dubai Marina, where I have been transforming smiles for the past 14 years, using the latest technologies, trends and quality material in the field of dentistry.

Cosmetic dentistry empowers people and gives them the self-esteem they need to approach life confidently. It significantly transforms a person's look (physique and aura) and how society perceives them and that transformation fuels my passion for my work and fills me with pride.

When you visit one of my clinics, I can guarantee that you will come in with a smile and leave with a grin!"
